

EVERYDAY EXERCISES A

DISCRETE STRUCTURES II FALL 2024

- (1) Talk to two or three other people in the class and make a group with them. Draw a graph whose vertices are the people in your group, with edges between any people that already know each other.

- (2) If a group's graph looks like a triangle, what does that mean about the people in the group?

If a group's graph looks like a triangle, then they all know each other and are connected in some sort of way
